New Patient Guide: A guide for new patients and their caregivers on navigating diagnosis, including providing information on appendix cancer and pseudomyxoma peritonei, quick links to patient resources, and information on first steps, such as seeking a specialist. Go to: acpmp.org/new-patient-guide

Find a Clinical Trial: A page for patients interested in identifying clinical trials that are currently enrolling AC/PMP patients. This resource provides the ability for a quick glimpse at the baseline information for each trial, and the point of contact to learn more. ACPMP will update this information on a periodic basis as additional confirmatory information about enrollment status and eligibility criteria is obtained. To check out our patient-friendly clinical trials page, go to https://acpmp.org/clinical-trials

Donating Fresh Tissue For Research: Pattern.org empowers patients to direct their excess cancer tissue samples to research projects. If you choose to donate, your tissue will be sent to the Broad Institute of MIT and Harvard, where it will be used to develop living research models to study appendix cancer and pmp. If you or a patient you know has an upcoming surgery or ascites drain, visit acpmp.org/tissue-donation or Pattern.org to learn more about the process of donating tissue to this project.

Participate in the ACPMP Patient Registry: ACPMP is exited to announce the creation of the ACPMP Appendix Cancer Pseudomyxoma Peritonei Patient Registry, a collaborative effort between ACPMP Research Foundation and the National Organization for Rare Disorders (NORD) to study Appendix Cancer and Pseudomyxoma Peritonei. Expected to launch Fall 2019.
